

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
She has 16 eggs per day
She eats 3 for breakfast
She bakes 4 with the remaining eggs
That leaves $16 - 3 - 4 = 9$ eggs
She sells the remaining 9 eggs at the farmers ' market at \$ 2 per egg
So the total amount of money she makes is $9 * 2 = 18$
</think>
<answer>18</answer>
