

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
Original price of the house = \$ 80 , 000
Repair costs = \$ 50 , 000
Increased value of the house = \$ 50 , 000
Original value of the house + Added uploading to extrapol path =r à¸à¸! atonin .herokuapp Head meet

It seems like my previous responses were corrupted . Here 's the correct solution :

<think>
Original value of the house = \$ 80 , 000
Repair costs = \$ 50 , 000
Increased value of the house = \$ 50 , 000
Selling price = Original value + Increased value = \$ 80 , 000 + \$ 50 , 000 = \$ 130 , 000
Profit = Selling price - Cost price = \$ 130 , 000 - \$ 80 , 000 = \$ 50 , 000
</think>
<answer>
The final answer is \$ 50 , 000 .
