

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

If the robe takes 2 bolts of blue fiber, and it takes half as much white fiber, it will take $2 / 2 = 1$ bolt of white fiber.

So, the total number of bolts is 2 (blue) + 1 (white) = 3 .

</think><answer>3</answer>
