

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think> Okay , so Janet's ducks lay 16 eggs per day . She eats 3 eggs for breakfast , so that leaves $16 - 3 = 13$ eggs . She bakes muffins with 4 eggs , so that means she uses 4 eggs for baking . That leaves $13 - 4 = 9$ eggs for the farmers ' market . She sells each egg for \$ 2 . To find out how much money she makes per day , I need to multiply the number of eggs she sells by the price per egg , which is $9 * 2 = 18$. So , she makes \$ 18 per day at the farmers ' market .</think><answer> 18 </answer>
