

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Total number of eggs laid per day = 16
Eggs consumed by Janet for breakfast = 3
Eggs used for baking = 4
Remaining eggs = 16 - 3 - 4 = 9
Janet sells eggs at the farmers' market at \$2 each
Amount of money Janet makes daily at the farmers' market = 9 * 2 = 18
</think><answer>18</answer>
