

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

<think>
Total size of the file = 200 GB
Carla's normal download speed = 2 GB / minute
Time taken to download the entire file = Total size of the file / Carla's normal download speed = 200 GB / 2 GB / minute = 100 minutes
Amount of the file already downloaded before the restart = 40 % of 200 GB = 0.4 * 200 GB = 80 GB
Time taken to download 80 GB = 80 GB / 2 GB / minute = 40 minutes
Total time taken by Windows to restart = 20 minutes
Total time taken to download the entire file again from the beginning = Time taken to download 80 GB + Time taken by Windows to restart = 40 minutes + 20 minutes = 60 minutes
Total time taken to download the entire file = Time taken to download it the first time + Time taken to download it the second time = 100 minutes + 60 minutes = 160 minutes
