

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

3 sprints a day, 3 days a week is $3 \times 3 = 9$ sprints a week

60 meters for each sprint, so 9 sprints in a week is $9 \times 60 = 540$ meters

</think>

<answer> 540 </answer>
