

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

<think>
200 GB / 2 GB / minute = 100 minutes
100 minutes x 40 % = 40 minutes
So the download before the restart was 100 - 40 = 60 minutes
Then 20 minutes are taken to restart
60 + 20 = 80 minutes
80 minutes x 2 = 160 minutes
</think>
<answer> 160 </answer>
