

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

2 bolts of blue fiber are needed , and half of that much white fiber , so $2 / 2 = 1$ bolt of white fiber is needed

$2 + 1 = 3$ bolts in total

</think>

<answer>

3 <address> 3 </address>
