

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the total number of eggs Janet's ducks lay per day is 16
Janet eats 3 eggs every morning
thus remaining eggs are $16 - 3 = 13$
she bakes muffins with 4 eggs
thus remaining eggs to sell is $13 - 4 = 9$
the selling price is \$2 per egg
thus her income at the market is $9 * 2 = 18$
</think>
<answer>
18
</answer>
