

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
If the robe takes 2 bolts of blue fiber, and half that much white fiber, then the robe takes $2 / 2 = 1$ bolt of white fiber.
To find the total, add both kinds of fiber: 2 bolts of blue fiber + 1 bolt of white fiber = 3 bolts in total.
</think>
<answer>
3 bolts in total </answer>
