

## Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

## Reasoning + Answer:

<think>The total number of eggs the ducks lay per day is 16. Janet eats 3 eggs for herself and bakes muffins with 4 eggs. So the total number of eggs she does not sell is  $3 + 4 = 7$ . The eggs she sells at the market are  $16 - 7 = 9$ . If she sells each egg for \$2, her earnings per day at the market are  $9 * \$2 = \$18$ . </think>

<answer>\$18</answer>
