

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
The robe takes 2 bolts of blue fiber. It also takes half of that amount in white fiber, which means it takes <think> 1 </think> bolt of white fiber. In total, it needs <think> 2 (blue) + 1 (white) = 3 </think> bolts of fibers.
</think>
<answer>
3 </answer> bolts in total are required.
