

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
She sells the remaining eggs , which are <think>
16 (total eggs per day) - 3 (eaten for breakfast) - 4 (baked for friends), which gives us 9 eggs .
Since she sells these eggs at the rate of \$ 2 per fresh egg , the earnings are <think>
9 (remaining eggs) * 2 (dollars per egg), which results in 18 dollars .
</think>
<answer>
18 </answer> dollars.</think>
