

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

`<think>`
the number of bolts of white fiber required is half that of blue fiber which is $2 / 2 = 1$.
the total bolts of fiber required is the sum of $2 + 1$ which totals to 3.
`</think>`
`<answer>`
3 `</answer>`
