

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the total number of eggs laid by ducks in one day is 16 , and she eats 3 so (16 - 3) = 13 is remaining to be sold .
hence she can earn $13 * 2 = \$26$ per day .
</think>
<answer>
26 </answer>
