

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

Total sprint runs each week: 3 sprints/run x 3 runs/week = 9 sprints/week

Total meters each sprint: 60 meters

Total meters runs per week: 9 sprints/week x 60 meters/sprint = 540 meters/week

</think>

<answer> 540 </answer>
