

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- The least developed part of the brain at birth is crucial for assessing newborn brain development .

- Visual system , thalamus , frontal lobe , brain stem , cerebellum , cortex , basal ganglia , hypothalamus , limbic system are all integral parts , but certain regions are known to be immature at birth .

- The brain stem is primarily involved in basic functions vital for survival , such as breathing and heart rate . It is typically one of the first regions to develop .

- Therefore , it is one of the last regions fully developed compared to other regions .

</think>

<answer>D . brain stem</answer>
