

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

He runs 3 sprints 3 times a week, that's $3 * 3 = 9$ sprints

He runs 60 meters each sprint, so $60 * 9 = 540$ meters in total

</think>

<answer>540</answer>
