

Question:
James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
He runs 3 sprints 3 times a week
He runs 60 meters each sprint
Total meters run in a week = 3 * 60 * 3
Total meters run in a week = 3 * 60 * 3
Total meters run in a week = 3 * 60 * 3
Total meters run in a week = 3 * 60 * 3
Total meters run in a week = 3 * 60 * 3
Total meters run in a week = 3 * 60 * 3
</answer>
