

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think> <think>the number of eggs she lays per day is <think>16</think>, but <think>3</think> are eaten for breakfast and <think>4</think> are used to make muffins , so the remainder are <think>16 - 3 - 4 = 9</think>. She sells the remainder daily for <think>2</think> dollars per fresh duck egg and so her daily earnings are <think>9 * 2 = 18</think> dollars </think> </think> <answer>18</answer> </answer>
