

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think> <think>the number of sprints is 3 sprints <think>and </think> he runs 3 times a week so the total number of sprints a week is 3 <times> 3 = 9 </think> and he runs 60 meters <think>each </think> sprint so he runs in total <think>9 <times> 60 = 540 </think> meters </think> <answer> 540 </answer> </think>
