

Question:
Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
First , figure out the eggs used for the break :
lay ed eggs per day : 1 6
break fast egg per day : 3
ex cess : $16 - 3 = 13$
baking the muffins with four eggs , so she sells :
(ex cess eggs per day minus the 4 used for muff ins) : $13 - 4 = 9$
She sells the remaining fresh eggs for \$ 2 each :
 $9 * 2 = 18$ dollars .
</think>
<answer>
18
</answer>
