

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

The number of eggs Janet’s ducks lay per day is 16 . She eats 3 for breakfast and uses 4 to bake muffins , so $16 - 3 - 4 = 9$ eggs left . She sells the remaining fresh duck eggs at the farmers ' market at \$ 2 per egg , so the revenue she makes every day is $9 * \$ 2 = \$ 18$.

</think>

<answer>

\$18 </answer>
