

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>The number of meters James runs in a single run is 60 meters * 3 = 180 meters. Since he runs 3 sprints a week, the total number of meters he runs in a week is 180 * 3 = 540 meters. </think>
><answer>540</answer>
