

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
A robe takes 2 bolts of blue fiber , which is half the amount of white fiber , so the robe needs <think>
 $2 * 2 = 4$ </think>
bolts of white fiber . To find the total number of bolts , add the blue and white fiber together . Therefore
, the robe needs <think>
 $4 + 2 = 6$ </think> bolts in total .
</think>
<answer>
6 </answer>
