

Question:
A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>
The robe requires <think>
2 bolts </think> of blue fiber .
Since it requires half that much white fiber , the amount of white fiber is <think>
 $2 / 2 = 1$ </think> bolt .
Therefore , the total amount of fiber required is the sum of blue fiber and white fiber , <think>
 $2 + 1 = 3$ </think> bolts .
</think>
<answer>
3 </answer>
