

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
The total distance James runs in one sprint is 60 meters .
Since he runs 3 sprints a week , the distance for three sprints is <think>
 $3 * 60 = 180$ meters </think>
To find the total distance for a week , we multiply this by the number of weeks which is 3 weeks <think>
>
 $180 * 3 = 540$ meters </think>
So , James runs a total of 540 meters in a week .
</think>
<answer>540 meters </answer>
