

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>The increased value of the house is 150% of 80000 which is <think> $80000 * 1.5 = 120000$ </think>. Total value of the house after the repairs is <think> $120000 + 80000 = 200000$ </think>. So profit is <think> $200000 - 130000 = 70000$ </think>. </think><answer>70000</answer>
