

Question:

Toulouse has twice as many sheep as Charleston. Charleston has 4 times as many sheep as Seattle. How many sheep do Toulouse, Charleston, and Seattle have together if Seattle has 20 sheep?

Reasoning + Answer:

<think>The number of sheep in Charleston is the double of what Toulouse has, meaning there are <think> $2 * 4 = 8$ </think> in Toulouse. The number of sheep in Seattle is just a part of the number in Charleston, which makes <think> $4 * 2 = 8$ </think> sheep in Charleston. So, all three cities together have <think> $8 + 8 + 20 = 36$ </think> sheep.</think><answer>36</answer>
