

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
the total eggs in a day are 16 and janet eats 3 eggs for breakfast therefore she has $16 - 3 = 13$ eggs left.
the other 4 eggs she bakes muffins with leaving $13 - 4 = 9$ fresh eggs.
every day she sells 9 fresh eggs to make \$2 per fresh egg $9 * 2 = 18$ dollars daily.
</think>
<answer>
18
</answer>
