

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

She lays 16 eggs per day and eats 3, so $16 - 3 = 13$ remaining. She uses four more for baking each day so $13 - 4 = 9$ are sold. She sells each for \$2 so $9 * 2 = \$18$ is made from selling eggs.

</think>

<answer>18</answer>
