

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<answer>D. Minimum = 3 , Maximum = 15 </answer>

<think> Reasoning process :

1. The Glasgow Coma Scale (GCS) is a neurological scale used to assess patients with brain injuries by evaluating their level of consciousness .
2. The GCS is composed of three components : Eye Opening , Verbal Response , and Motor Response .
3. The maximum possible scores for each component are :
 - Eye Opening : 4 (spontaneous opening of both eyes)
 - Verbal Response : 5 (orientated and able to sustain a conversation)
 - Motor Response : 6 (obeying commands)
4. Therefore , the maximum possible total GCS score is $4 + 5 + 6 = 15$.
5. The minimum possible GCS score is 3 , which corresponds to :
 - Eye Opening : 2 (no response)
 - Verbal Response : 1 (no verbal response)
 - Motor Response : 0 (no motor response)
 - Total : $2 + 1 + 0 = 3$
6. Although some versions of the GCS have a maximum score of 18 , the 5th edition of the GCS has a maximum of 15 .
7. Therefore , the correct answer is D. Minimum = 3 , Maximum = 15 </think>
