

**Question:**

Shock causes:

Answer Choices:

- A. Stagnant hypoxia
- B. Anemic hypoxia
- C. Hypoxic hypoxia
- D. Histotoxic hypoxia

**Reasoning + Answer:**

<think>  
Shock can lead to a reduction in oxygen delivery to tissues and can cause hypoxemia and hypotension . Considering the answer choices and the context , hypoxic hypoxia is the most relevant as it is caused by decreased oxygen supply to tissues despite normal oxygen content in the blood .  
</think>  
<answer>  
C. Hypoxic hypoxia  
</answer>
