

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- We need to identify the least developed part of the brain at birth .
- The brain develops from the base to the top , and from the back to the front .
- At birth , the brain stem is fully functional for basic life-sustaining functions .
- The cerebrum , which includes the cortex , is less developed at birth compared to other parts .
- The frontal lobe , part of the cerebrum , is particularly less developed at birth as it is involved in complex cognitive functions that develop over time .
